

# AUSTRALIA'S WONDERS

## CHRYSOCEPHALUM SILVER & GOLD

Silver & Gold is a thick, mat forming ground cover that is very useful in lots of different ways. It can cover up to one square metre, and acts as an excellent weed suppressant. It also works well as a natural mulch to keep the soil cooler.

The grey-green foliage is a complementary contrast to other garden plants, and you'll see stunning golden flower clusters covering the plant for most of the year, bringing an exciting flush of colour to the garden.

Silver & Gold is fast growing and sturdy, handling light frosts and periods of dryness. And not only is this variety highly effective as a ground cover, but it also looks great in pots and tubs, on banks and next to retaining walls.

### HIGHLIGHTS:

- Clusters of golden button like flowers
- Performs well as a natural mulch
- Thick foliage suppresses weeds
- Easy care, low maintenance
- Will withstand extended periods of dryness

<b>Species</b>	<i>Chrysocephalum apiculatum</i>
<b>Common name</b>	Everlasting Daisy
<b>Produced from</b>	Cutting
<b>Tray size</b>	162
<b>Label code</b>	51-3947
<b>Height/Width</b>	30cm / 1m
<b>Habit</b>	Prostrate ground cover
<b>Growing pH</b>	pH 5.5 - 6.5
<b>Finishing Times</b>	In 140mm, 10-12 weeks
<b>Pests &amp; Diseases</b>	Very few problems with pests or diseases have been experienced, with the exception of aphids.
<b>Position</b>	Full sun
