

LOMANDRA LIME TUFF

Lomandra Lime Tuff is a tidy, compact plant with an upright habit. It offers fine, bright green foliage and stays lush all year round, with zero maintenance requirements.

Lime Tuff is extremely hardy and can tolerate frost, drought, shade, sun and coastal conditions, as well as clay or sandy soils. Because of its shape and size, Lime Tuff is ideal to use for contrast, low level plantings where height restrictions are required in urban landscapes. It can also be used to create borders or for understory plantings in the home garden.

Lime Tuff is recognized for its vibrant colour and hardy nature. Its low maintenance and high health characteristics result in it being one of the toughest Lomandra in the market.

HIGHLIGHTS:

- Neat, compact plant
- Fine, bright green foliage
- Smaller than other Lomandra
- Frost & drought tolerant
- Suitable for coastal areas
- Can handle clay & heavy soils

Species	<i>Lomandra longifolia x confertifolia subsp. pallida</i>
Common name	Strappy leaf grass
Produced from	Tissue Culture
Tray size	105
Label code	005002-58
Height/Width	50cm / 50cm
Habit	Upright, compact habit
Growing pH	pH 6.0 - 6.5
Finishing Times	In 140mm, 8-10 weeks
Pests & Diseases	No major pests or diseases
Position	Full sun/part shade
