MANDEVILLA

## MANDEVILLA ALOHA PINK STAR

A brand new addition to Ramm's Mandevilla range is the stunning Mandevilla Aloha Pink Star. Bred by Australian company NuFlora, Pink Star is Australian grown and owned, and has been bred for Australian conditions, with all royalties remaining in Australia!

Unlike any other Aloha Mandevilla, Pink Star offers unique star markings on its vibrant hot pink flowers, that stand out against the glossy green foliage. These markings result in a distinct, eye catching plant that looks great as a feature plant on the patio in a pot, or in the garden.

Like other Aloha Mandevilla, Pink Star offers features the range is known for: a neat habit and free flowering nature on a hardy, heat loving plant. It's fast growing and well branched, but has more of a climbing nature than other varieties. You can expect to see flowers consistently during the warmer months, and all year in warmer climates.

### HIGHLIGHTS:

- Abundance of unique, star marked flowers
- Bred for Australian conditions
- Presents well in a 140mm or in a 300mm pot with a trellis

<b>Species</b>	<i>Mandevilla hybrid</i>
