

SENECIO TRIDENT BLUE

Trident Blue is an easy-care ground cover with thick, elongated powdery blue leaves that display an intriguing shape. Bred by Attila Kapitany for Australian conditions, Trident Blue is easy to grow, has low water needs and low maintenance requirements.

Trident Blue is similar to well-known Senecio varieties commonly known as Blue Chalk Sticks. Unlike these varieties however, Trident Blue is a low growing, spreading plant with a tighter habit. This results in less unsightly gaps showing off messy stems, and instead a thicker sea of stunning blue foliage.

Trident Blue looks great all year round, retaining its colour and texture throughout. Its set apart from similar varieties and is an absolute stand out, showing off its unique form and eye catching colour.

Ramm will be donating 10c to beyondblue for every Trident Blue label sold in Australia.

HIGHLIGHTS:

- Blue/grey leaves with a powdery finish
- Interesting lance-like shape
- Thick ground cover that acts as an excellent weed suppressant

Species	<i>Senecio hybrid</i>
Common name	Blue chalk sticks
Produced from	Cuttings
Tray size	105
Label code	51-4607
Height/Width	30cm / to 2m
Habit	Low growing ground cover
Growing pH	pH 6 - 6.5
Finishing Times	In 140mm, 12-14 weeks
Pests & Diseases	No major pests or diseases
Position	Full sun
